FDOT Completes Adaptive Signal Control Technology (ASCT) Pilot Project

State Road (SR) 924/NW 119 Street and SR 9/NW 27 Avenue

Miami, Fla. – The Florida Department of Transportation (FDOT) has completed an Adaptive Signal Control Technology (ASCT) Pilot Project along SR 924/NW 119 Street between NW 32 Avenue and NW 5 Avenue and along SR 9/NW 27 Avenue. This design-build project started in the fall of 2017 and cost an estimated \$3.6 million.

This project included installation of traffic sensors at 12 intersections on NW 119 Street and three intersections on NW 27 Avenue. This new advanced system adjusts traffic signal timing based on real-time traffic demand to optimize traffic flow along the corridor.

FDOT completed this project with the support of elected officials and the community. Horsepower Electric, Inc. was the contractor.

For more information please visit www.fdotmiamidade.com. You may also call FDOT's Public Information Office at (305) 470-5349 or Senior Community Outreach Specialist Heather M. Leslie at (305) 905-5876.

Drivers are encouraged to call 511 before they travel or log on to www.fl511.com to get real-time traffic and lane closure information. FDOT would like to remind drivers that wearing a safety belt is the single most effective way to protect people and reduce fatalities in motor vehicles crashes. Please drive cautiously in construction zones.
