## Lane Reduction on Westbound I-395 Ramp to Northbound I-95

**MIAMI, Fla.** – On Friday morning, February 19, the right lane on the westbound I-395 ramp to northbound I-95 will be closed from just east of the ramp entrance to where the ramp merges to one lane. The closure of the lane will allow the project contractor to remove sections of the ramp to begin construction of the foundations for the new permanent two-lane ramp. To view additional information on the lane closure, click [here](#).

Please note that this schedule may change due to bad weather or other unforeseen conditions.

The work is part of the I-395/SR 836/I-95 Design-Build Project that will reconstruct the I-395 corridor from the SR 836/I-395/I-95 (Midtown) Interchange to the MacArthur Causeway Bridge, including the construction of a Signature Bridge over NE 2 Avenue and Biscayne Boulevard; double-deck SR 836 from west of NW 17 Avenue to the Midtown Interchange and the replacement of the concrete pavement on I-95 from NW 8 Street to NW 29 Street.

For additional information, please contact Community Outreach Specialist Oscar Gonzalez at 786-280-0983. Additional project information can be found on the project website, [www.I-395miami.com](http://www.I-395miami.com).

The Florida Department of Transportation's mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of the state's environment and communities. The department is committed to building a transportation system that not only fits the current needs of Florida's residents and visitors, but also enhances mobility throughout the state to accommodate its consistent and rapid growth. The unique nature of the Sunshine State and its year-round warm climate provides numerous opportunities to achieve the department's mission through multiple transportation modes including highways/streets, air, rail, sea, spaceports, transit, and the ever-expanding deployment of bicycle & pedestrian facilities.
