State Road (SR) A1A/Collins Avenue Extended Lane Closure Hours Begin April 19

At the Intersections of 10 and 11 Street

MIAMI, Fla. – On Tuesday, April 19 and Wednesday, April 20, travel lanes through the intersections of SR A1A/Collins Avenue and 10 Street and 11 Street will be closed beyond 3:30 p.m. so workers can safely install concrete foundations for the new traffic signal mast arms at these intersections.

At least one lane will remain open in each direction on SR A1A/Collins Avenue and 10 Street, and 11 Street will be open for local traffic only. Drivers might experience delays traveling through the area and should seek alternate routes if possible.

Please use caution when traveling through construction zones and note that this schedule may change due to bad weather or other unexpected conditions.

For more information, please contact FDOT's Public Information Office at (305) 470-5349, or Construction Community Outreach Specialist Christian Gonzalez at (786) 837-4884 or csgonzalez@corradino.com. For additional information about this or other FDOT projects, please visit www.fdotmiamidade.com.

Drivers are encouraged to log on to www.fl511.com before they travel to get real-time traffic and lane closure information. FDOT would like to remind drivers that wearing a safety belt is the single most effective way to protect people and reduce fatalities in motor vehicle crashes.

The Florida Department of Transportation's mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of the state's environment and communities. The department is committed to building a transportation system that not only fits the current needs of Florida's residents and visitors, but also enhances mobility throughout the state to accommodate its consistent and rapid growth. The unique nature of the Sunshine State and its year-round warm climate provides numerous opportunities to achieve the department's mission through multiple transportation modes including highways/streets, air, rail, sea, spaceports, transit, and the ever-expanding deployment of bicycle & pedestrian facilities
