### **State Road (SR) 9 Roadway Project Completed Ahead of Schedule**

**MIAMI, Fla.** – The Florida Department of Transportation (FDOT) has successfully completed the SR 9/NW 27 Avenue Roadway Construction Project from SR 934/NW 79 Street to SR 932/NW 103 Street, in Miami-Dade County, ahead of schedule. FDOT completed this work with the support of elected officials and the community. The seven-month project began on May 12, 2020 and cost an estimated \$1.5 million. The contractor, LEAD Engineering, earned an incentive of \$100,000 for early completion.

The following scope of work was performed on this project: installing new drainage inlets and pipes to connect to the existing drainage system; reconstructing driveways that restrict waterflow; reconstructing sidewalks, pedestrian ramps, bicycle lanes, and curb and gutter; and repaving and restriping the roadway.

For more information, please call FDOT's Public Information Office at (305) 470-5349 or Community Outreach Specialist Maria Alzate at (305) 560-8218. You may also visit [www.fdotmiamidade.com](http://www.fdotmiamidade.com).

Drivers are encouraged to log on to [www.fl511.com](http://www.fl511.com) to get real-time traffic and lane closure information. FDOT would like to remind drivers that wearing a safety belt is the single most effective way to protect people and reduce fatalities in motor vehicle crashes. Please drive cautiously in construction zones.

The Florida Department of Transportation's mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of the state's environment and communities. The department is committed to building a transportation system that not only fits the current needs of Florida's residents and visitors, but also enhances mobility throughout the state to accommodate its consistent and rapid growth. The unique nature of the Sunshine State and its year-round warm climate provides numerous opportunities to achieve the department's mission through multiple transportation modes including highways/streets, air, rail, sea, spaceports, transit, and the ever-expanding deployment of bicycle & pedestrian facilities
